WHO WE ARE

- >> We are a private non-profit organization and since 2003 we aim at developing the space activities in the Czech Republic.
- >> We spread the word about this cross-cutting scientific and technical subject among both professionals and laymen.
- >> Our main objective is to ensure the largest possible and most-effective participation of Czech industrial and academic R&D organizations in both national and international space projects.
- >> We promote the use of space applications and benefits of space technologies in Czech Republic, especially the GMES services.
- >> We manage and issue the catalogue of Czech companies and institutions with capacity and interest in space projects.
- >> We publish information and promo materials about Czech space projects and its results.

OUR RESULTS

- >> For the last nine years we have been providing professional personal support for the Ministry of Education in the agenda of space research and development.
- >> We have assisted on working level in the course of the long process of accession to ESA Convention.
- >> Our employees are delegated into ESA bodies, GMES organs and other committees and working groups of the European Union.
- >> Our work helped to commence more than 50 space projects of 30 companies and other R&D organizations.
- >> Since 2008 we have helped more than 30 Czech students to cover attendance fees in their traineeships, international competitions and space summer courses.
- >> We organized more than 80 training courses, seminars and conferences.
- >> In 2010 we organized the 61st International Astronautical Congress in Prague.
